ROVERCH

Department of Mathematical Sciences
CHALMERS UNIVERSITY OF TECHNOLOGY
Gothenburg, Sweden 2014

- 1 Physical laws and the spatial relations
- 2 Translation of a parse tree into a goal
- 3 The solver
- 4 Handling quantifiers
- 5 Ambiguous utterances
- 6 Handling large worlds and complicated goals
- 7 New linguistic structures
- 8 Description of the actions of the planner
- 9 Speech recognition/synthesis
